PROFESSIONAL SUMMARY

Senior Cloud Infrastructure & SAP Basis Engineer with 8+ years of experience specializing in sizing, deploying, hardening, migrating, and optimizing enterprise **SAP workloads on Google Cloud Platform (GCP)** on **SUSE Linux Enterprise Server (SLES 15 SP5/SP7 for SAP Applications)** following strict SAP Notes compliance.

Extensive background in High Availability architectures (Pacemaker / Corosync, STONITH / SBD fencing with GCP Fence Agents), extreme performance storage sizing (block-aligned XFS, LVM, IOPS tuning on Hyperdisk/SSD for SAP HANA 2.0 and SAP CAR Rise), automation with **Terraform and Ansible**, and observability with **IBM Instana APM / OpenTelemetry**. Bridges technical cloud infrastructure, networking, security, and functional SAP consulting with strategic team leadership, backed by a dual background in Information Systems and Labor Relations.

TECHNICAL SKILLS & COMPETENCIES

- SAP Infrastructure & Cloud:** SAP CAR (Customer Activity Repository) Rise, SAP S/4HANA (Infrastructure / Basis), SAP NetWeaver, SAP HANA 2.0 (HSR - HANA System Replication, SPS 06/07, Backint for Google Cloud Storage), Google Cloud Platform (Compute Engine certified for SAP, Bare Metal Solution, VPC Peering, Cloud Interconnect, IAM, Secret Manager).
- Operating Systems & High Availability:** SUSE Linux Enterprise Server (SLES 15 SP5 / SP7 for SAP Applications), Red Hat Enterprise Linux (RHEL), Pacemaker, Corosync, STONITH / SBD fencing, GCP Fence Agents, Linux Kernel Tuning (*saptune*, *sysctl*, *HugePages*, *sapcontrol*, *crm_mon*).
- Storage & File Systems:** XFS (Block-aligned I/O), LVM, optimized partitioning and mount points for `/usr/sap`, `/sapmnt`, `/hana/data`, `/hana/log`, `/hana/shared`, Google Cloud Persistent Disk (SSD Extreme / Hyperdisk), Filestore (NFS).
- laC & Automation:** Terraform (Certified Modules for SAP Private Topologies), Ansible for SAP, Bash Scripting, Python (Automation & Health-check Scripts).
- Databases & DBA:** SAP HANA 2.0 (Memory Management, Delta Merges, Backint Backups), Microsoft SQL Server, PostgreSQL.
- Observability & Networking:** IBM Instana APM (Host OS Sensors, JVM, DB Metrics), OpenTelemetry, Google Cloud Operations, Infoblox NIOS (DNS/DHCP), Firewall Rules & Cloud NAT.

PROFESSIONAL EXPERIENCE

Technical Lead & Senior Systems Engineer (Cloud Infrastructure / ERP Focus) | Reforest Latam

May 2024 – Present | Full-time (Remote)

- Architected and implemented secure integration and persistence layers** connecting transactional/financial platforms with microservices on Google Cloud Platform, enforcing Zero-Trust policies and dedicated Service Accounts.
- Ensured 99.9% operational uptime SLAs** through proactive observability pipelines, automated alerting, and orchestrating zero-impact scheduled maintenance windows.
- Led infrastructure governance and business continuity directives**, aligning resilience and deployment standards across engineering and operations teams.

Senior SAP Cloud Infrastructure & DevOps Consultant | Independent Consulting & Enterprise Projects

January 2021 – Present | Strategic B2B Technology Consultant (Independent / Contract / Remote)

- Developed reusable Terraform modules and Ansible playbooks for secure private topologies and SAP-certified VMs on GCP**, achieving a **70% reduction in SAP environment provisioning lead time**.
- Spearheaded end-to-end sizing, migration, and deployment of SAP CAR Rise on GCP:** configuring Compute Engine instances, OS hardening on **SLES 15 SP7**, kernel tuning with *saptune*, and **XFS/LVM storage optimization** for `/usr/sap` and `/sapmnt`.
- Maximized critical storage performance and throughput** by configuring block-aligned XFS volumes and advanced LVM management for transactional mount points and NFS Filestore shares.
- Integrated IBM Instana APM for real-time monitoring of CPU, memory, IOPS, and High Availability cluster health (Pacemaker/Corosync)**, cutting Mean Time to Resolution (MTTR) by 45%.
- Engineered hybrid connectivity and disaster recovery plans (DRP) with Infoblox NIOS**, migrating 12 DNS domains and 283 DHCP subnets under high-availability architectures.

Senior Software Engineer & Database Administrator | University of Buenos Aires (UBA)

March 2018 – February 2024 | Institutional Systems Specialist (Part-time / Buenos Aires, Argentina)

- Designed and implemented automated replication and backup policies across 8+ TB of corporate data**, guaranteeing **strict compliance with RPO < 15 min and RTO < 1 hour**.
- Optimized storage and I/O performance**, resolving file system bottlenecks and administering high-concurrency database servers.

Systems Infrastructure & Operations Coordinator | Government of the City of Buenos Aires (GCBA)

January 2020 – December 2023 | Full-time (Buenos Aires, Argentina)

- **Coordinated scheduled maintenance windows between infrastructure and telecommunications teams**, achieving a **30% reduction in operational disruption** during large-scale upgrades.
- **Guaranteed a 99.9% operational uptime SLA** across citizen-facing government digital platforms.

EDUCATION

- **Associate Degree in Information Systems** | National Technological University (UTN) (*In Progress — Expected Graduation: December 2026*)
- **Bachelor's Degree in Labor Relations & Human Resources** | University of Buenos Aires (UBA) (*Graduated — Focus on Organizational Leadership, Talent Strategy & High-Performance Team Dynamics*)

KEY CERTIFICATIONS (VERIFIABLE ON CREDLY)

- **Official Industry Certifications (Proctored Exams):** Google Cloud Certified Associate Cloud Engineer (ACE) | Microsoft Certified: Azure Fundamentals (AZ-900) | GitHub Foundations Certified.
- **Accredited Professional Specializations:** SUSE Linux Enterprise Server Administration & Hardening for SAP Applications | IBM Instana Observability & APM Specialist | IBM DevOps & Software Engineering Professional Certificate.

LANGUAGES

- **Spanish:** Native
- **English:** Full Professional Proficiency (C1 / Full technical fluency for SAP Cloud architecture design, live engineering syncs, RFCs, and technical documentation)
