PROFESSIONAL SUMMARY

Senior Cloud Infrastructure & Enterprise Migrations Architect with 8+ years of experience specializing in IaaS architecture design, sizing, **Terraform** provisioning, OS hardening, and multi-cloud migration of **SAP platforms (SAP BW on HANA and SAP CAR Rise) and mission-critical workloads to Google Cloud Platform (GCP)** from **Microsoft Azure and VMware** on **SUSE Linux Enterprise Server (SLES 15.5, 15.6, and 15.7 for SAP Applications)**.

Proven track record provisioning high-memory instances on **Google Cloud Platform**, high-throughput storage (**block-aligned XFS/LVM**), internal load balancing for central services, **Terraform** automation, and full-stack observability with **OpenTelemetry, Prometheus, and Grafana**.

TECHNICAL SKILLS & COMPETENCIES

- **Cloud Infrastructure (GCP & Azure):** IaaS Architecture for mission-critical workloads on Google Cloud Platform (Compute Engine, Internal Passthrough Network Load Balancer, Private Service Connect - PSC to BigQuery, Cloud KMS, Cloud Interconnect / VPN, Shared VPC).
- **Operating Systems, Storage & File Systems:** SUSE Linux Enterprise Server (SLES for SAP Applications), Red Hat Enterprise Linux (RHEL), Ubuntu, Windows Server (Active Directory), Block-aligned XFS, LVM.
- **Virtualization & Networking:** Hybrid Linux/Windows environments, Failover Clustering, Private Networking, and Load Balancing.
- **IaC, Automation & Security:** Terraform (IaaS Modules & Landing Zones), Terragrunt, Ansible, GitHub Actions, ArgoCD, Python, PowerShell & Bash Scripting, Zero-Trust IAM, Cloud Armor.
- **Observability, Networking & Databases:** OpenTelemetry, Prometheus, Grafana, Google Cloud Monitoring, Microsoft SQL Server (2012–2022), PostgreSQL, BigQuery, Redis.

PROFESSIONAL EXPERIENCE

Technical Lead & Senior Systems Engineer (Cloud Infrastructure & ERP Focus) | Reforest Latam

May 2026 – Present | Full-time (Remote)

- Spearheaded **FinOps on Google Cloud Platform**, optimizing compute sizing, storage tiers, and elastic autoscaling to deliver a **sustained 28% reduction in monthly cloud spend**.
- Architected secure integration layers, private networking, and a **Zero-Trust posture on GCP** (least-privilege IAM, dedicated Service Accounts, Cloud Armor WAF) paired with **GitOps pipelines in GitHub Actions and ArgoCD** (**Lead Time cut from 5 days to minutes, 99.9% SLA**).
- Directed an **engineering team of 6**, leading core ERP modernization, financial reconciliation workflows, and operational resilience standards.

Senior SAP Cloud Infrastructure & Migrations Consultant | Independent Consulting & Enterprise Projects

January 2021 – Present | Strategic B2B Technology Consultant (Independent / Contract / Remote)

- **Multi-Cloud IaaS Architecture for SAP on GCP (Enterprise Clients under NDA):** Designed IaaS architectures and provisioned with **Terraform** high-availability GCP environments for SAP workloads on **SLES for SAP**, sizing high-memory compute instances with high-throughput storage, internal passthrough load balancers for central services (ASCS/ERS), **Cloud KMS**, hybrid connectivity (**Cloud Interconnect / VPN**), and private analytical integration with **BigQuery**.
- **Corporate Server Migrations to GCP (Clients under NDA):** Led wave-based planning and migration onto **Terraform Landing Zones** (Shared VPC, Cloud NAT, IAP) and **GKE**, covering Windows Server and Linux workloads, SQL Server engines, and directory services.
- **Observability & Operational Continuity (Clients under NDA):** Implemented full-stack telemetry with **OpenTelemetry, Prometheus, and Grafana**, cutting **MTTR by 45%**, and executed Disaster Recovery (DRP/BCP) plans for critical network and database services.

Senior Software Engineer & Database Administrator (DBA) | University of Buenos Aires (UBA)

March 2018 – February 2024 | Institutional Systems Specialist (Part-time / Buenos Aires, Argentina)

- Architected HA replication and automated backup policies across **8+ TB of institutional data (+500 GB migrated from critical legacy databases)** on **SQL Server and PostgreSQL** serving **+50,000 users (+10,000 concurrent active users)**, meeting **RPO < 15 min and RTO < 1 hour**, cutting **p95 query latency by 55%**, and reducing **manual operational effort by 60%** with Python and Bash scripts.

Systems Infrastructure & Operations Coordinator | Government of the City of Buenos Aires (GCBA)

January 2020 – December 2023 | Ministry of Economic Development (Full-time / Buenos Aires, Argentina)

- Coordinated maintenance windows, hybrid Linux/Windows infrastructure, and database engines (**SQL Server, PostgreSQL, MySQL, and MongoDB**) across citizen portals serving **100,000+ monthly users**, guaranteeing **99.9% SLA**, **-30% operational incidents**, and **-35% overnight backup windows**.

FEATURED PROJECTS & HACKATHONS

- **Autonomous FinOps Engine (Aleph Hackathon 2026):** Autonomous Python engine that audits GCP infrastructure and generates **Terraform (IaC)** code to optimize compute and storage costs.

EDUCATION, CERTIFICATIONS & LANGUAGES

- **Education: Associate Degree in Information Systems** | UTN *(In Progress — Expected Graduation: Dec 2027)* · **Bachelor's Studies in Labor Relations & HR** | UBA *(Advanced University Coursework Completed / Organizational Leadership)*.
  - *Certifications* (Verifiable on Credly & Coursera):* IBM DevOps and Software Engineering Professional Certificate | IBM Security for Professionals and DevOps Professionals | Google Cloud Fundamentals: Core Infrastructure | IBM IT Scrum Master Specialization | IBM Full Stack Software Developer (V5) | IBM Java Developer (V2).
- **Languages: Spanish:** Native · **English:** Professional Working Proficiency (B2 — Fluent technical communication for live engineering syncs, RFCs, and documentation).
