PROFESSIONAL SUMMARY

Senior Cloud Architect and DevOps Engineer with 8+ years of experience spearheading the design, automation, multi-cloud migration, resilience, and financial optimization (**FinOps**) of mission-critical enterprise infrastructure. Core specialist in **Google Cloud Platform (GCP)**, migrations from **VMware and Microsoft Azure**, enterprise virtualization on **Microsoft Hyper-V 2025**, container orchestration on **Kubernetes (GKE Autopilot/Standard)**, and Infrastructure as Code with **Terraform / Terragrunt**.

Proven track record designing multi-environment Landing Zones on **Google Cloud Platform and Microsoft Azure with Terraform**, **GitOps workflows (ArgoCD, GitHub Actions)**, full-stack observability (**OpenTelemetry, Prometheus, Grafana**), and **DevSecOps / Zero-Trust** governance aligned with DORA metrics.

TECHNICAL SKILLS & COMPETENCIES

- **Cloud & Multi-Cloud Platforms:** Google Cloud Platform (Compute Engine, GKE Autopilot/Standard, Shared VPC, Cloud Interconnect / VPN, Cloud Run, Cloud Storage, Cloud Armor WAF, Zero-Trust IAM, Cloud KMS, Secret Manager), Microsoft Azure, AWS.
- **IaC, GitOps & Automation:** Terraform (Reusable Modules, Remote Backends, GCS State Locking), Terragrunt, ArgoCD, Helm Charts, Ansible, Python, PowerShell & Bash Scripting.
- **Virtualization, SAN Storage & Resilience:** Microsoft Hyper-V (Failover Clustering, Switch Embedded Teaming - SET, Live Migration), VMware vSphere/ESXi, Nutanix AHV, Fibre Channel SAN Storage (MPIO, CSV volumes), Veeam Backup & Replication (VBR), Migrate to VMs (M4CE), and DRP/BCP Strategies.
- **CI/CD, Containers & DevSecOps:** Docker, Kubernetes (GKE, NetworkPolicies, Ingress, HPA), GitHub Actions, GitLab CI, Trivy, SonarQube (SAST/DAST), Security Hardening.
- **Observability, SRE & FinOps:** OpenTelemetry (OTel), IBM Instana APM, Zabbix, Google Cloud Operations (Monitoring/Logging), Prometheus, Grafana, SLOs/SLIs, DORA Metrics, FinOps.
- **Systems, Networking & Databases:** Linux (SLES for SAP, RHEL, Ubuntu, Debian), Windows Server, Active Directory, Infoblox (DNS/DHCP), Cloud SQL, PostgreSQL, SQL Server, SAP HANA IaaS Infrastructure, BigQuery, Redis.

PROFESSIONAL EXPERIENCE

Senior Python Backend & Financial Automation Engineer | Reforest Latam

May 2026 – Present | Full-time (Remote)

- Architected and developed end-to-end the financial operations platform and transactional Telegram bot in **Python 3.11+ (aiogram 3.x, asyncio, Pydantic)** with **Redis-persisted FSM** state management (**RedisStorage** and **events_isolation** double-click protection), shared HTTP connection pooling (**aiohttp**), exact decimal accounting (**ROUND_HALF_UP**), real-time **fail-closed RBAC**, and **Baserow / Google Drive API** integration.
- Built an **atomic multi-currency bank reconciliation engine** featuring native PDF/CSV/Excel statement parsers (BBVA, Galicia, Macro, Mercury, Balanz), **SHA-256** deduplication in Redis, decoupled staging with semantic auto-classification, batch injection with **atomic batch rollback**, historical **MEP Dollar** exchange rate lookup with T-1 to T-5 business-day fallback, and sanitized **ARCA** tax exports.
- Implemented **dual LLM OCR & automated classification (Gemini 2.5 Flash and DeepSeek via OpenRouter)** using semaphore-bounded concurrent PDF chunking and prompt-injection sanitization; deployed on **Linux VPS with Docker Compose**, automated daily Drive backups, and **GitHub Actions CI/CD** running **Ruff** and **514 passing Pytest integration tests (100% green)**.

Senior Cloud & Infrastructure Architect (Enterprise B2B Consulting) | Corporate Projects

January 2021 – Present | Strategic B2B Technology Consultant (Independent / Contract / Remote / Hybrid)

- **Multi-Cloud Architecture & Terraform Landing Zones (Clients under NDA):** Designed and provisioned enterprise infrastructures on **Google Cloud Platform and Microsoft Azure** using reusable **Terraform** modules (Shared VPC, Zero Public IP, Cloud NAT, Cloud IAP, Cloud KMS, and DEV/QA/PROD GKE clusters).
- **Platform Modernization & CI/CD Automation (Clients under NDA):** Automated deployment of microservices and relational/analytical databases in the cloud with **GitHub Actions, Docker, Kubernetes, and Python/Bash**, cutting provisioning lead times and manual errors.
- **Distributed Observability & Operational Continuity (Clients under NDA):** Implemented end-to-end monitoring and tracing with **OpenTelemetry, Prometheus, and Grafana**, achieving a **45% reduction in MTTR**, and executed high-availability Disaster Recovery (DRP/BCP) plans.

Senior Software Engineer & Database Administrator (DBA) | University of Buenos Aires (UBA)

March 2018 – February 2024 | Institutional Systems Specialist (Part-time / Buenos Aires, Argentina)

- Architected High Availability and automated backup strategies across an **8+ TB institutional data ecosystem** (including zero-loss migration of **+500 GB of critical legacy databases**) on **SQL Server and PostgreSQL** serving **+50,000 users (+10,000 concurrent active users)**, maintaining **99.9% uptime, RPO < 15 min, and RTO < 1 hour**.
- Executed **Performance Tuning** (execution plans, indexing, deadlock resolution) cutting **p95 query latency by 55% (-40% average response time)**, and automated infrastructure/ETL routines with **Python, Alembic, and Bash (-60% manual operational workload)**.

Systems Infrastructure & Operations Coordinator | Government of the City of Buenos Aires (GCBA)

January 2020 – December 2023 | Ministry of Economic Development (Full-time / Buenos Aires, Argentina)

- Guaranteed **99.9% operational uptime (SLA)** and zero unplanned downtime across hybrid Linux/Windows infrastructure serving citizen portals with **100,000+ monthly users**, reducing **production incidents by 30%**.
- Administered **SQL Server, PostgreSQL, MySQL, and MongoDB** instances, optimizing automated backups (**-35% overnight backup windows and -95% data loss risk**), backend validation layers (**-40% data inconsistencies**), and training **+30 officials** in SQL.

FEATURED PROJECTS & HACKATHONS

- **Autonomous FinOps Engine (Aleph Hackathon 2026):** Autonomous Python engine that scans GCP environments to detect idle infrastructure and automatically generates **Terraform (IaC)** remediation code.
- **Monitor CI/CD (DORA Metrics) & OmniSync (EDA):** Real-time dashboard (TypeScript, Node.js, WebSockets) integrated with GitHub Actions and GitLab CI under DORA standards, and an event-driven architecture engine with Dead Letter Queues (DLQ).

EDUCATION, CERTIFICATIONS & LANGUAGES

- **Education: Associate Degree in Information Systems** | UTN *(In Progress — Expected Graduation: Dec 2027)* · **Bachelor's Studies in Labor Relations & HR** | UBA *(Advanced University Coursework Completed / Organizational Leadership)*.

  - *Certifications* (Verifiable on Credly & Coursera):* IBM DevOps and Software Engineering Professional Certificate | IBM Security for Professionals and DevOps Professionals | IBM Full Stack Software Developer (V5) | IBM Java Developer (V2) | Meta Back-End Developer | Google Data Analytics | IBM IT Scrum Master | Google Cloud Fundamentals: Core Infrastructure.
- **Languages: Spanish:** Native · **English:** Professional Working Proficiency (B2 — Fluent technical communication for live engineering syncs, RFCs, and documentation).
